FINISHES & CARE INSTRUCTIONS

All of our products featured in this brochure are brass based and we offer a **lifetime mechanical guarantee**.

#VALUETHINGSTHATLAST

With a little TLC these products have outstanding anti-corrosive properties, if maintained as per the instructions for each finish, they too will last a lifetime. We have included cleaning instructions under each of the finishes, to help maintain your handle or mortice knob. Keeping it as fresh as the day you purchased it.

SB: SATIN BRASS

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

POLISHED BRASS

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

MB: MATT BLACK

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the powder coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

AB: ANTIQUE BRASS

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

PN: POLISHED NICKEL

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the plated finish. A microfibre dry cloth can also be used to wipe over the product and reduce finger marks. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

SN: SATIN NICKEL

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the plated finish. A microfibre dry cloth can also be used to wipe over the product and reduce finger marks. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

MBRZ: MATT BRONZE

As this is a live finish the product will naturally darken with age. Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

SC: SATIN CHROME

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the plated finish. A microfibre dry cloth can also be used to wipe over the product and reduce finger marks. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

CP: POLISHED CHROME

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

SCO: SATIN COPPER

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

PCO: POLISHED COPPER

Use of a soft cloth soaked in warm soapy water and dried off with a microfibre cloth. Do not use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

SCOUL: UNLACQUERED SATIN COPPER

Antimicrobial Copper Alloys **continuously reduce bacterial contamination, achieving 99.9% reduction within two hours of exposure**. As the copper is unlacquered, it will naturally age through oxidisation, giving the product added character. However, if desired this finish can be maintained by using a dry cloth and Brasso which will clean this finish. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.

PCOUL: UNLACQUERED POLISHED COPPER

Antimicrobial Copper Alloys **continuously reduce bacterial contamination, achieving 99.9% reduction within two hours of exposure**. As the copper is unlacquered, it will naturally age through oxidisation, giving the product added character. However, if desired this finish can be maintained by using a dry cloth and Brasso which will clean this finish. Annual oiling of all moving parts using a 3-in-1 Oil helps maintain the moving parts.
